Subject: draft section

John,

I agree with your comments on consistency across the animal studies; it is worth taking a quick look through once our draft is nearing "streamlined completion". I realized you haven't seen this draft version (which is in a much more lengthy form than final). If you have additional comments on the inhalation limitations in these studies, please feel free to add comments.

Barbara, FYI, I made a few minor edits to the epi section since I last sent this to you.

Thanks,
Andrew
